Oviano Gunadi AL Falah

Frontend Developer

0896 3629 9984 vianalfalah248@gmail.com www.linkedin.com/in/vianalfalah

PROFILE SUMMARY

Frontend Developer with 5+ years of experience building scalable web applications and data-driven dashboards using React and Next.js. Experienced in developing internal operational systems and client platforms with complex data visualization and transaction monitoring features. Skilled in integrating REST APIs and building performant user interfaces using modern frontend technologies such as TanStack Query, Redux, and Tailwind CSS..

PROFESSIONAL EXPERIENCE

2021 - 2026 **PT QOIN DIGITAL INDONESIA**

Frontend Developer Jan 2021 – Mar 2026

- Developed multiple **internal admin and operational web applications** used by internal teams to monitor business activities, transaction histories, and operational data through interactive dashboards.
- Built several **client-facing web applications** with dashboard features, transaction history tracking, data monitoring systems and user management ecosystems.
- Implemented **data-driven dashboards and charts** to visualize operational and analytical data.
- Integrated **RESTful APIs** with frontend applications using Axios while managing server state with **TanStack Query** and global state using **Redux and Zustand**.
- Translated **Figma UI/UX designs into production-ready interfaces** using Tailwind CSS, SCSS, Material UI, and Shadcn UI.
- Developed **landing pages for company products and project releases** using Next.js with performance optimization and responsive design.
- Built **reusable UI components and chart modules** used across multiple dashboard-based applications.
- Refactoring a React application to Next.js
- Collaborated with **backend engineers, product teams, and designers** to deliver scalable web applications.

PROJECT EXPERIENCE

2026 - 2026 **Arkadia Global Teknologi (Contract)**

Frontend Developer Feb 2026 – Sep 2026
Project: Enterprise Decision Support System
Features:

- Executive & Data Dashboards: Developed interactive dashboards for monitoring and analyzing business data.
- Integrated dynamic, interactive geospatial maps utilizing **OpenLayer** and **Mapbox GL** for precise geographical data visualization.
- Transformed raw data streams into real-time KPI visualizations using a hybrid approach with **ApexCharts**, **Chart.js**.
- Data Management: Developed detail pages with advanced filtering, data export, and server-side pagination.
- Dynamic RBAC: Implemented role-based navigation and permission management.
- API Integration: Integrated multiple **REST APIs** and developed reusable data-driven components.

Project: API Management & Developer Portal
Features:

- API Documentation & Testing: Developed an interactive interface for API documentation and

endpoint testing.
- API Management: Built interfaces for API configuration and endpoint management.
- Access Management: Implemented role-based access control and user management.
- Developer Portal: Developed self-service interfaces for API consumers.

2023 - 2024 **Merkle Innovation (Contract)**

Client **Siloam IPD**
Frontend Developer

- Developed an **internal hospital management interface** supporting inpatient processes, master data management, housekeeping, bad management and operational workflow.
- Integrated **backend APIs** to manage hospital operational data.
- Built responsive and reusable UI components using **React and Material UI**.

FORMAL EDUCATION

2018-2022 **Universitas Indraprasta PGRI (UNINDRA)**

Bachelor of Informatics Engineering

2020-2021 **Bootcamp Dumbways.ID**

Bootcamp Fullstack Web Developer - Fullstack Javascript (React, Express, React Native)

- Developed several **fullstack web applications** using JavaScript ecosystem technologies including **React, Node.js, Express, and Sequelize**.
- Implemented **REST API integration** between frontend and backend systems.
- Converted several web applications into **mobile applications using React Native**.
- Delivered multiple end-to-end projects covering **frontend, backend, and mobile development**.

SKILL

Tools & Others : Git, Bitbucket, Keycloak Authentication, Postman, Insomnia, Jira (project coordination), Figma, VS Code

Frontend : React.js, Next.js, JavaScript, TypeScript.

Data Visualization & GIS : Mapbox GL, Openlayer, Chart.js, Recharts.

State Management : Redux, Zustand, TanStack Query.

Styling : Tailwind CSS, SCSS, Material UI, Shadcn UI .

Portfolio : https://vian-alfalah-portfolio.pages.dev/
